Philly Tech Sistas Quick Reference Guide (HTML)

More HTML Elements: https://developer.mozilla.org/en-US/docs/Web/HTML/Element

Element Type	Description	Example

COMMENTS	Annotations that can act as notes, commentary or explanations within your code. They show up in the browser, but don't do anything.
	Hint: Select code you want to "comment out" and click ⌘ + / (Mac) or CTRL + / (PC).
		`<!-- <ul>⸤SEP⸥`
		`  <li>Order</li>⸤SEP⸥`
		`  <li>Doesn't</li>`
		`  <li>Matter</li>`
		`</ul> -->`

Tables	Tables are a way to represent complex information in a grid format. They are made up of rows and columns.	`<table> <caption>Title of your table</caption> <tr> <th>Column header 1</th> <th>Column header 2</th> </tr> <tr> <td>Data 1</td> <td>Data 2</td> </tr> </table>`
Font	The font tag can be embedded within any tag- especially content tags like p, span, or td. This will add formatting such as font color, size or font type.	`<font size=2 color=pink face=arial>Hello</font>`

Formatting	Want special formatting? Use the tags individually or together via nesting/	`<b> or <strong>Bold<strong>`
		`<i> or <em>Italics</em>`
		`<u>underline</u>`
		`<font face=arial size=2 color=pink>Pink</font>`
		`<span style="color:red">Red</span>`

Video	embed video clips and movie streams into your HTML	`<video controls>`
		`  <iframe width="560" height="315" src="https://www.youtube.com/embed/WDZJPJV__bQ" frameborder="0" allow="accelerometer; autoplay; encrypted-media; gyroscope; picture-in-picture" allowfullscreen></iframe>`
		`</video>`

Audio	embed music and other audio	`<audio controls>`

Element Type	Description	Example

	streams	`<source src="sweetjams.ogg" type="audio/ogg">`
		`<source src="https://media.blubrry.com/causeascene_podcast/b/content.blubrry.com/causeascene_podcast/Vincent_J_Intondi.mp3" type="audio/mpeg">`
		Oh no! You're browser doesn't support this audio so you can't hear the latest Cause a Scene podcast!
		`</audio>`

Main	The body element contains ALL the html on the page. But, main just contains elements not in the header or footer. It helps modern technologies to navigate to main content. There should only be one per file.	`<main>`
		`<h1>Main Topic</h1>`
		`<p>Description of the main topic./p>`
		`<article>`
		`<h1>Article Title</h1>`
		`<p>Content for the article.</p>`
		`</article>`
		`</main>`

Section	Section of a document such as chapters, headers, or footers.	`<section>`
		`<h1>My Hobbies</h1>`
		`<p>I like to crochet, read, and do yoga.</p>`
		`</section>`

Article	Specifies independent, self-contained content that makes sense on its own and should be possible to distribute independently from the rest of the site. It is used for forum and blog posts, news stories, and comments.	`<article>`
		`<h1>Article Title</h1>`
		`<p>Content for the article.</p>`
		`</article>`

Footer	Defines the footer of a file or section.	`<footer>`
		`<p>Written by: Jane Doe/p>`
		`</footer>`
